

## Software Developer

A recent graduate eager to learn and explore the world of tech. With my enthusiasm in software development and data science, I would like to explore my path and learn and experiment more about it in my future positions.

### WORK EXPERIENCE

---

#### Retail Store

##### Retail team member

- Assisted customers with inquiries, complaints and product information.
- Collaborated with the team members to improve customer satisfaction.
- Operating with cash register and a POS system.
- Prepare end of day report.

### EDUCATION

---

#### Bachelor of Computer Science

La Trobe University • Bundoora, VIC

### CERTIFICATIONS

---

#### Agile Requirements Foundations

LinkedIn

#### Career Essentials in Software Development

Microsoft and LinkedIn

#### Pursuing Business Analysis Certification

### AWARDS & SCHOLARSHIPS

---

#### Best Project in Undergraduates level in IT and Computer Science 2020 • 2019

LaTrobe University

#### Aspiring Advantage Scholarship

LaTrobe University

### PROJECTS

---

#### Pipeline to synthesize 3D images using blender to train machine learning Object detection •

2022 - 2024

UX machine and LaTrobe University

UX machine collaborated with the university to allow the students to come up with a pipeline that enables a smooth process of synthesizing images in a blender which is used to train the object detection model.

**Language: Python**

**Platforms: Blender and TensorFlow**

**Role: Team leader**

Contributions:

- Implementation of Google Object Detection API
- Distribution of work between the team members

- Resolving team issues.
- Reporting to the Project manager and the client.
- Documentation of the Pipeline.
- Conducting daily meetings.

**Spite** • 2020 - 2024

**Tools:** Android studio, Google Firebase API, Figma, Jira, GitHub.

**Workout Tracking Application:** An app you could use to record your daily workouts and compete with your antagonist. The antagonist will be assigned to you randomly and changed monthly. You will compete with your antagonist to see who reaches their goal first. An app that would keep the user on track using their spite to win over their opponent by reaching the goal first.

Role: Backend and Front-end developer

Contributions:

- Implement Google Firebase products such as Authentication, Cloud Message and Cloud Firestore.
- Design and implementation of the UX and UI of the application.
- Create Test plans and implemented them with various test users.

## SKILLS
